

MUHAMMAD AITISAM YASEEN

Senior Full-Stack Developer | Team Lead | Solutions Architect

Karachi, Pakistan | +92 316 3043977 | m.aitisamyaseen@gmail.com

PROFESSIONAL SUMMARY

Full-stack developer and technical lead with 5+ years of experience building, modernizing, and deploying web, SaaS, desktop, and cloud applications. Experienced across the full SDLC, from requirements and architecture to development, testing, deployment, and team guidance. Strong background in multi-tenant systems, real-time applications, REST APIs, database design, AWS media workflows, and secure role-based platforms.

PROFESSIONAL EXPERIENCE

Codefied | Team Lead / Full-Stack Developer / Solutions Architect

Aug 2024 - Present

- Lead architecture and delivery across Laravel, MERN, and PERN applications while defining technical standards, mentoring developers, and coordinating product-focused execution.
- Architected multi-tenant products including a hospitality platform, freight and logistics CRM, inventory system, and an operations suite spanning sales, projects, QA, HR, and accounts.
- Built PWAs and Electron desktop applications, real-time workflows with Socket.IO and SSE, and AWS media pipelines using S3, CloudFront, and MediaConvert.

AFU Systems | Full-Stack Developer

Apr 2024 - Aug 2024

- Migrated a legacy HTML, CSS, and JavaScript product to the MERN stack and redesigned client-server workflows for maintainability and scale.
- Implemented secure authentication, email and WebSocket features, plus server-side querying, batching, and segmented export of large CSV datasets.

Experts Communication | Full-Stack Developer

Feb 2024 - Apr 2024

- Built MERN and PERN applications from requirements through deployment; owned debugging, testing, production fixes, and maintainable feature delivery across client projects.

Daneen Technovision | Web Developer

2018 - 2019

- Developed responsive web applications and server-side APIs with Core PHP and MySQL, managing projects from requirements and architecture through deployment and maintenance.

Freelance | Software Engineer / Full-Stack Developer

2018 - Present

- Deliver custom web and business applications for local and international clients, managing discovery, architecture, development, deployment, maintenance, and client communication.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Bootstrap, PWA, Electron

Backend: Node.js, Express.js, Fastify, NestJS, Laravel, REST APIs, Socket.IO, SSE

Data: PostgreSQL, MySQL, MongoDB, Drizzle ORM, Sequelize

Cloud & DevOps: AWS S3, CloudFront, MediaConvert, GCP, DigitalOcean, Hostinger VPS, Firebase, Supabase, Git, GitHub, Linux, Nginx, Docker

Architecture: Multi-Tenant SaaS, Solution Architecture, RBAC, JWT, Database Design, Real-Time Systems, SDLC, Team Leadership

EDUCATION

ACCP Pro - Advanced Diploma in Software Engineering | Aptech Computer Education | 2014 - 2018
